

Position: High-School Robotics and Engineering Teacher

Hours: Can either be a full-time position or a part-time position

Start Date: August, 2023

Qualifications: Position is a teaching position with an emphasis on engineering, physics, robotics, electronics and CAD mechanical design. Experience with FIRST robotics is a strong plus. Teaching license is preferred with an engineering endorsement, or be working towards obtaining one. If the applicant is interested in working towards a teaching license but does not currently hold a teaching certificate they may be considered.

Classes Taught: Robotics and some but not all of the following classes, depending on the applicant's areas of expertise: Engineering Technology, Engineering Principles, Electronics, CAD Mechanical Design, Manufacturing Principles and Physics.

Extra-Curricular Assignment: Co- Coach of our school's FIRST robotics team. During the 2023-2024 school year, this might be the head coach position or it might be an assistant coach position, but by the 2024-2025 school year it will be the head coach position (since our current head coach is transitioning into retirement).
